

HIGH QUALITY OPEN ACCESS PUBLISHING AND RESEARCH NETWORKING

Frontiers is Open Science

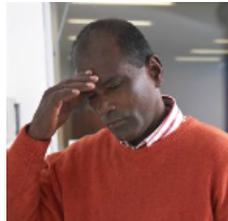

Frontiers is an online platform for the scientific community to publish open-access articles and network with colleagues.

- ▶ Fast, open-access publication
- ▶ Rigorous peer-review in real-time thanks to our interactive, online interface
- ▶ Detailed metrics to follow the impact of articles
- ▶ A networking platform made especially for the scientific community

IN THE NEWS

Predictors of depression, stress, and anxiety among non-tenure track faculty

Over the past four decades, colleges and universities in the US have seen an increase in the number of non-tenure-track (NTT) faculty. Nationwide, 70% of faculty members in higher education are employed off the tenure-track. Most NTT...

BIOENGINEERING AND BIOTECHNOLOGY

Study on the antimicrobial properties of citrate-based biodegradable polymers
In this study, various citric acid derived biodegradable polymers were synthesized and investigated for their physicochemical and antimicrobial properties. Results indicate that citric acid derived polymers reduced bacterial proliferation...

ECOLOGY AND EVOLUTION

The evolution of African plant diversity

Africa, symmetrically astride the equator, is rich in biodiversity paradoxes. The Sahara, the world's largest desert, is arguably the largest extremely species-poor area on the planet. At the other end of the continent is the Cape flora, arguably the globally most species rich temperate flora...

EBOOK

Time and Causality

The problem of how humans and other intelligent systems construct causal representations from non-causal perceptual evidence has occupied scholars in cognitive science for many decades. Most contemporary approaches agree with David Hume that patterns of covariation between...
